Company Profile

In the world of healthcare, we take pride in our outstanding achievements in importing advanced medical equipment. We are committed to delivering the latest technologies that enhance the quality of healthcare services and contribute to the development of innovative medical solutions tailored to meet our customers' needs.

Explore Our Journey of Leadership and Excellence

We are a leading company in the field of importing and distributing medical equipment and supplies. Our strength lies in providing cutting-edge technologies and maintaining the highest standards of quality to serve the evolving needs of the medical sector.

With a strong commitment to excellence, we offer a comprehensive range of products and solutions designed to support healthcare providers and ensure effective, reliable, and outstanding patient care. Our dedication to innovation, quality, and customer satisfaction positions us as a trusted partner in advancing healthcare services.

Vision

To be a global life-sciences company transforming lives through pathbreaking discoveries.

Mission

To unlock new possibilities in life-sciences through quality healthcare solutions that impact lives.

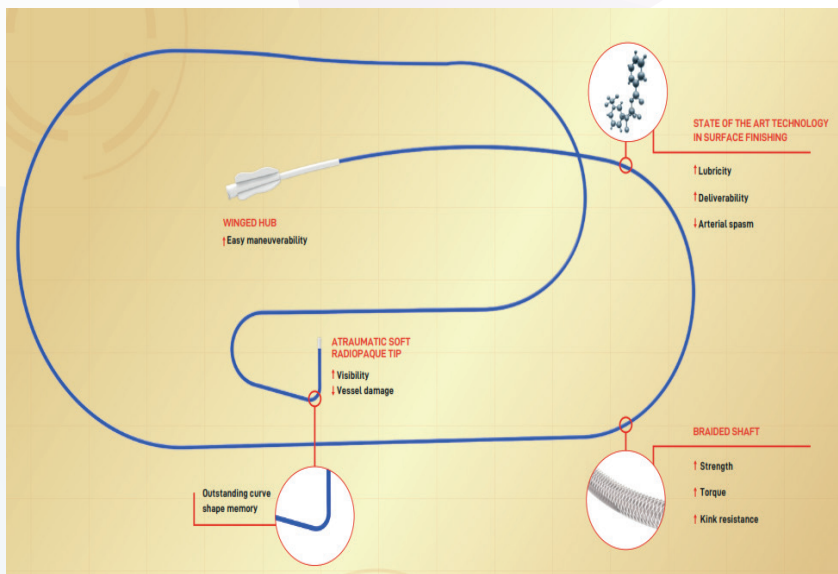

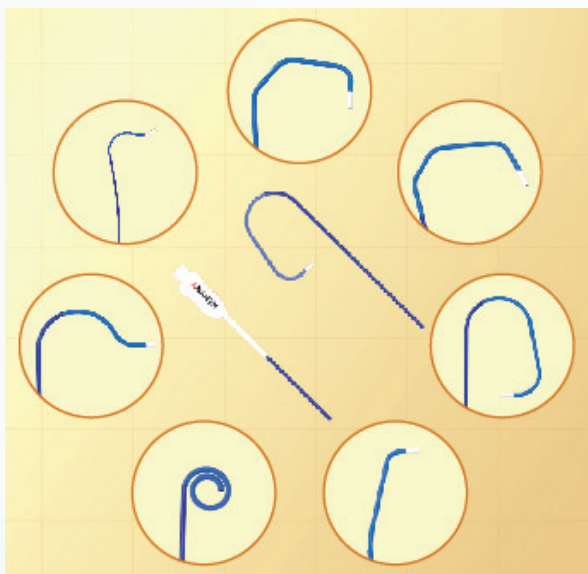

Purpose

Empowering people with the freedom to live healthier and more full

Stent Architecture

- M'Sure-S stent is built on 59µm cobalt chromium platform.
- Our special electro-polishing technique ensures an ultra-low strut thickness of 59µm.
- M'Sure-S Ensure 0.29% foreshortening & <3% recoil.

Intelligent unique Stent design gives high degree of flexibility, excellent scaffolding, lesser chances of recoil and foreshortening and high radial strength

Low strut thickness of 59 µm + 2 µm of drug and polymer coating

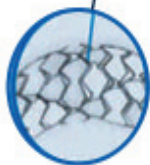

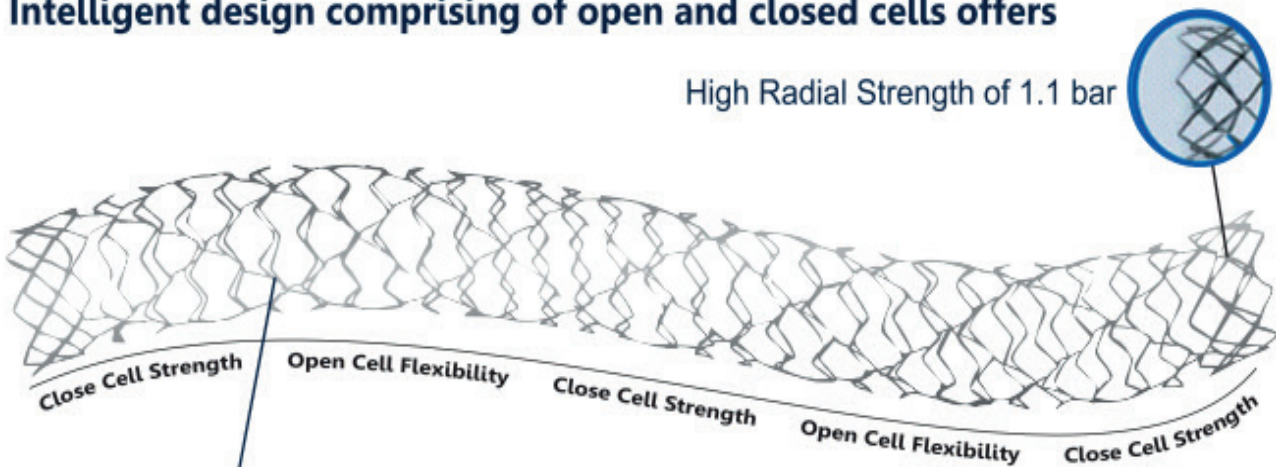

Time tested sirolimus drug and bio compatible timed to release 30-40 days

Intelligent Cell Design

Provide optimal radial strength, high degree of flexibility & excellent Scaffolding.

Intelligent design comprising of open and closed cells offers

High Radial Strength of 1.1 bar

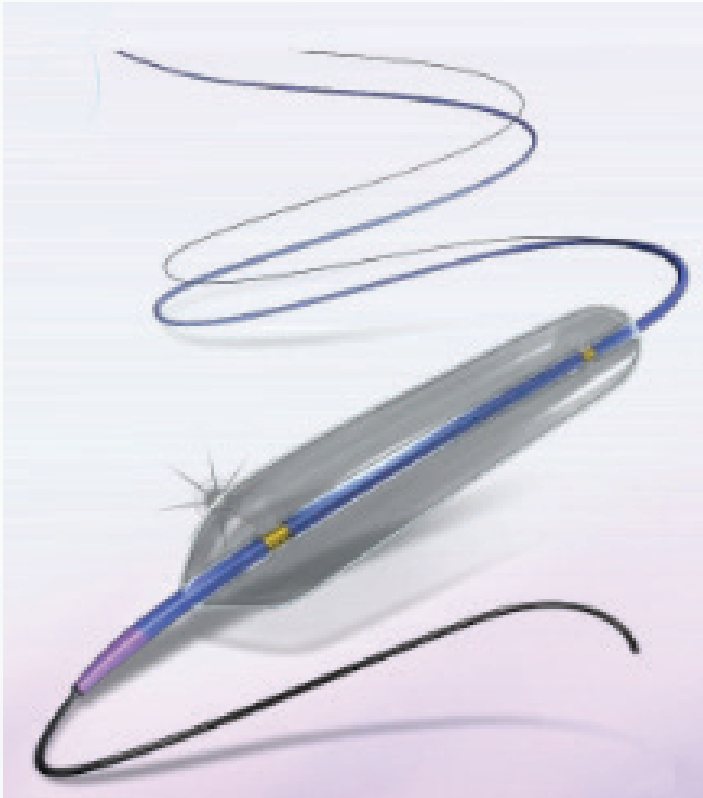

High Degree of Flexibility

Safety & Efficacy established by PRISM Basket of Clinical Trials.

Pearl NC - PTCA Balloon

- Focused inflation force
- Controlled pushing of stent towards the vessel wall

- The extremely flexible tip helps the balloon catheter to reach tortuous anatomies
- Durable non complaint balloon designed to tackle multiple dilatation needs

- Integrated markers and small shaft diameter facilitates contrast media injection in small size guiding catheters
- Rapid inflation/deflation and excellent rewrap characteristics.
- Reduced balloon profile

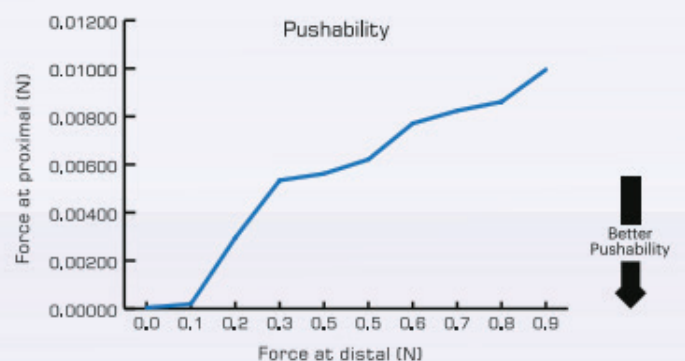

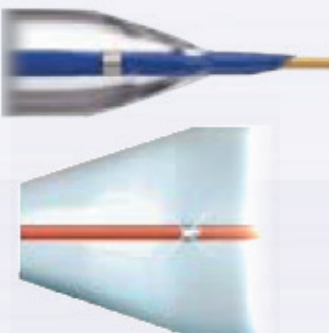

2,75 mm comparative compliance chart
Pearl NC Vs predicative

Features

- Premium range of balloons designed for superior crossability, reliable deliverability and greater versatility
- Integrated markers and small shaft diameter facilitates contrast media injection in small size guiding catheters
- Reduced balloon profile
- Advanced balloon pleat and fold processing for ultra-low crossing profiles

RF13AX Reusable Flexible Cystoscope

The New Standard in Flexible Video Cystoscopy and Reprocessing

High-definition images clearly observe pathological details

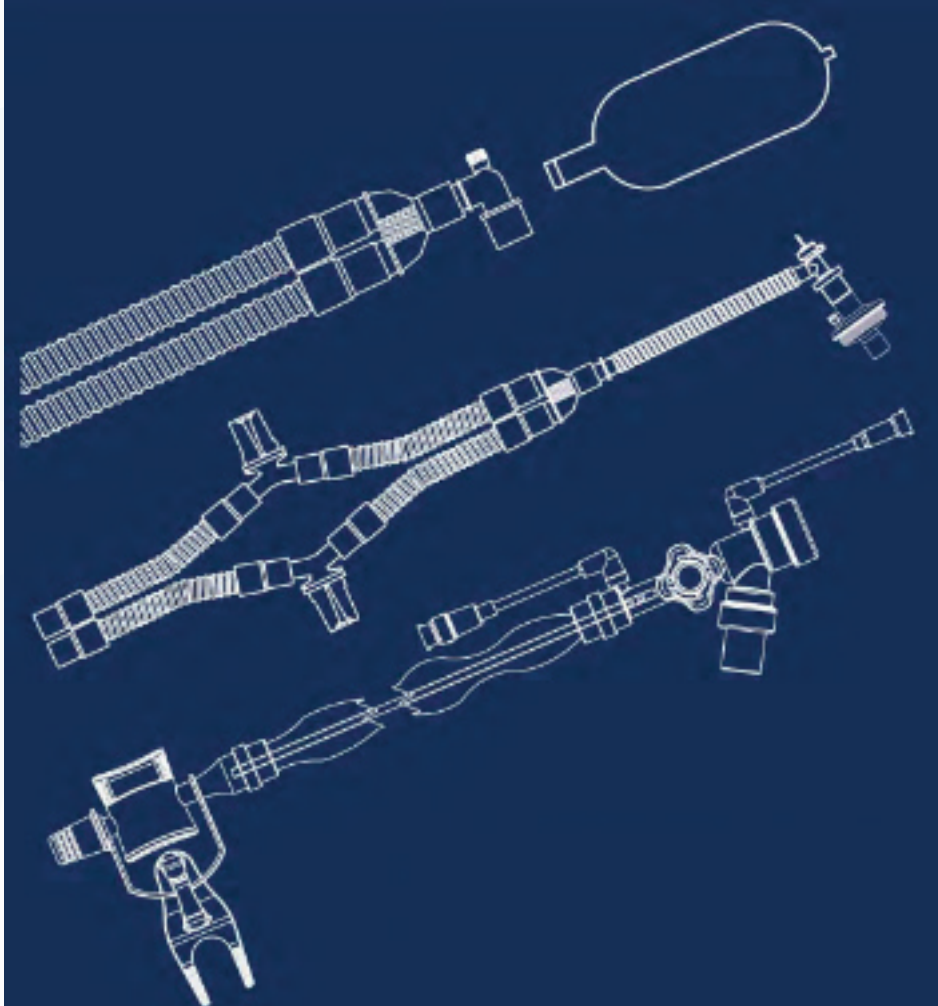

Compatible with a wide range of surgical procedures

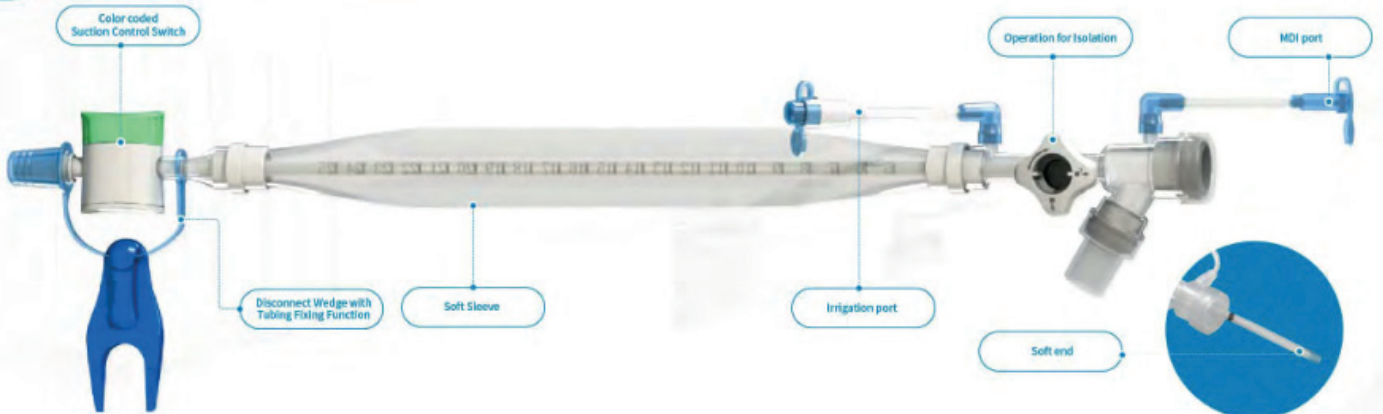

Multiple connection methods to adapt to different needs

E CLOSED SUCTION SYSTEM

GaleMed

Anesthesia Circuit can be best described as the lifeline between the patient and the anesthesia workstation. It consists of a combination of interfaces that enable the delivery of anesthetic gases to patients in a consistent and highly regulated manner. Hence, we offer a variety of devices to equip you with tools to deliver the best results.

GaleMed offers a comprehensive line of products and technologies for anesthesia. The improved design makes it convenient to use while maintaining the superior quality that healthcare professionals rely on.

Your Best Choice for Anesthesia Circuit

Airway Management

Airway management is an important first step in the domain of mechanical ventilation and anesthesia. It directly impacts on the safety of patients. We offer a range of Berman and Guedel airways that are safe, effective and able to provide greater flexibility to healthcare professionals.

Anesthesia Circuits

Our anesthesia circuits are available in durable and disposable models. We also provide fixed or adjustable lengths for the disposable models for more flexibility. To provide a combination that best suits your needs, a wide selection of circuits and accessories are also available.

Face Masks

Face mask is another important aspect in respiratory care. We also designed face masks a step further by incorporating a port onto the mask that allows the insertion of measuring tubes, nasogastric tubes or endoscopy tubes.

GaleMed

Breathing Circuit can be best described as the lifeline between the patient and the mechanical ventilator. It consists of a combination of interfaces that deliver air to patients in a consistent and highly regulated manner.

The improved design makes it easy to use while maintaining the superior quality that healthcare professionals rely on.

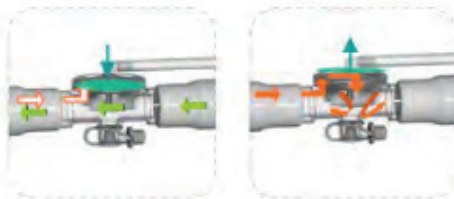

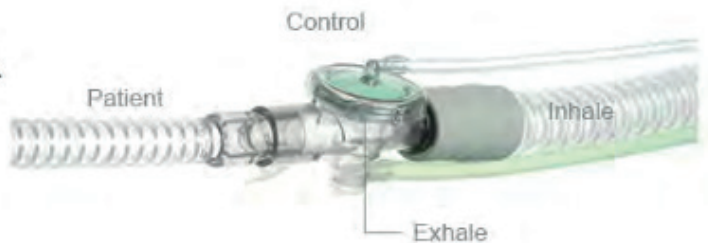

Your Best Choice Breathing Circuit and Accessories

Durable Single Limb Ventilator Circuit

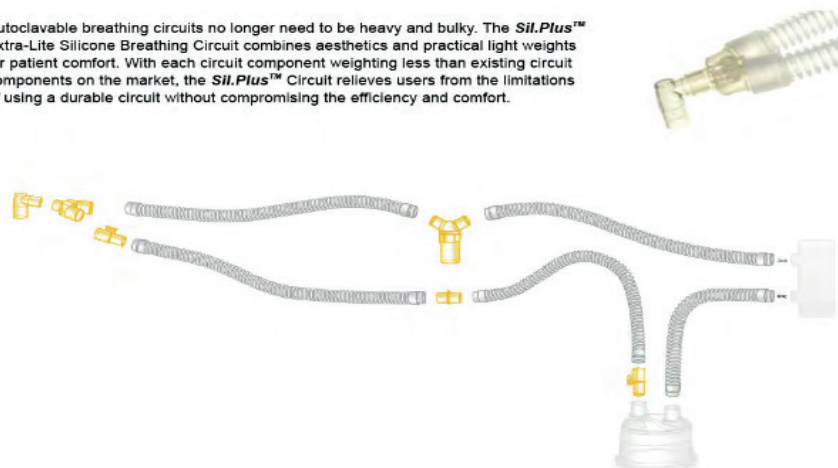

- Suitable for home care, ambulatory and emergency transport settings.
- Highly efficient Manifold has a quieter and prompt response.
- Smoothbore tubing is easy to clean and minimizes air turbulence in the circuit.
- All parts autoclavable at 134°C.

Sil.Plus™ Silicone Breathing Circuit

Autoclavable breathing circuits no longer need to be heavy and bulky. The *Sil.Plus™* Extra-Lite Silicone Breathing Circuit combines aesthetics and practical light weights for patient comfort. With each circuit component weighting less than existing circuit components on the market, the *Sil.Plus™* Circuit relieves users from the limitations of using a durable circuit without compromising the efficiency and comfort.

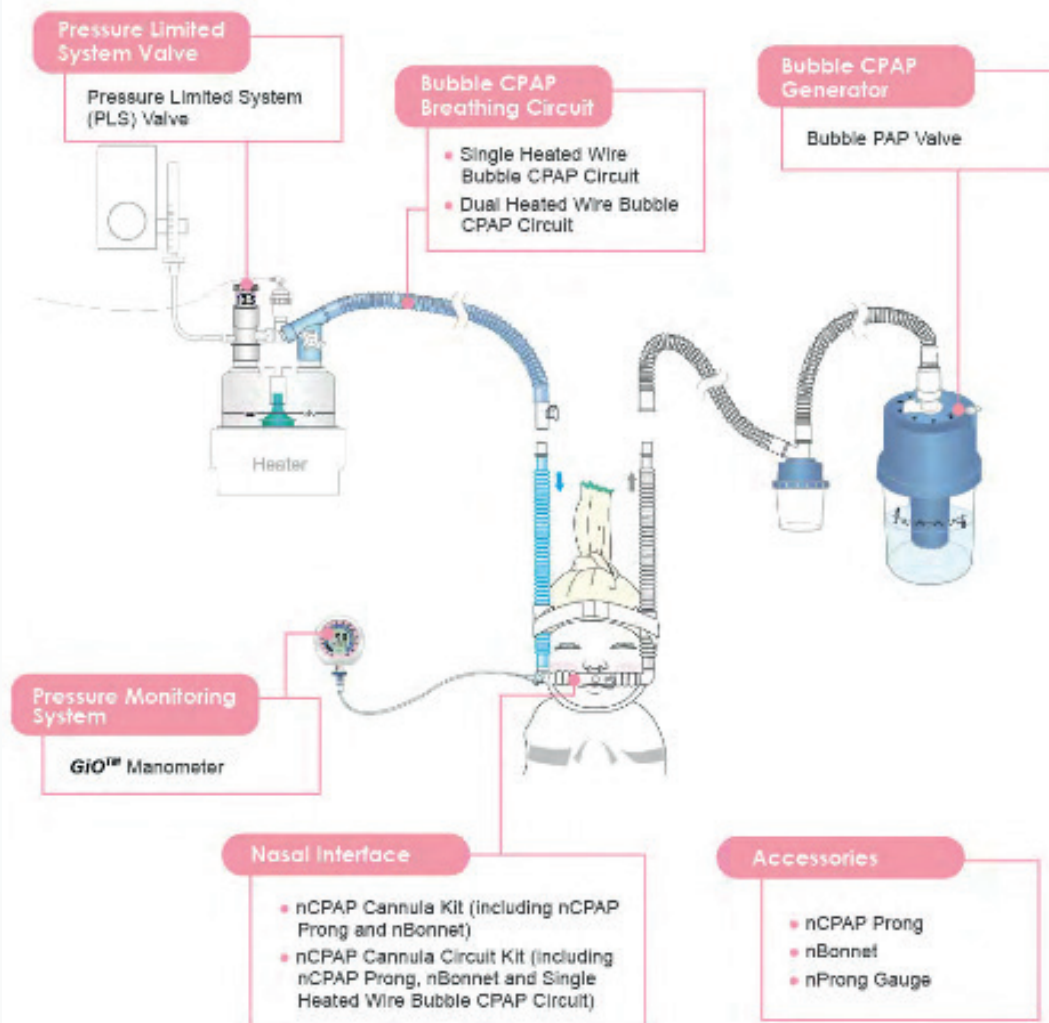

Babi.Plus®

Over the past decades, the increase in preterm births has become a challenging problem globally. Unlike healthy newborns, premature babies may have more health problems, including brain, heart, eyes, and respiratory issues. Owing to their premature lungs, most premature babies have breathing difficulties to survive.

The invention of Babi.Plus was supported by a team of experienced physicians, engineers, and respiratory therapists, who work effectively to provide a comprehensive range of medical care solutions for neonates. We trust these innovative solutions could offer healthcare professionals a superior option for delivering medical care and achieving better outcomes.

We care for the most fragile lungs.

GaleMed

Oxygen Therapy is necessary for patients with low oxygen saturation who are unable to obtain adequate oxygen on their own. It consists of various interfaces for different requirements, such as low-flow oxygen devices, high-flow oxygen devices, and aerosol therapy.

GaleMed offers comprehensive solutions for patients with asthma, COPD, bronchopulmonary diseases, and dyspnea, integrating our four core values—safety, ergonomics, comfort, and practicality—into our product design.

Making Every Breath Easier

Oxygen Nasal Cannula

Soft Ear Padding

- Prevents pressure sores around ears
- 100% cotton material
- Minimizes skin irritation

Magic Fitting

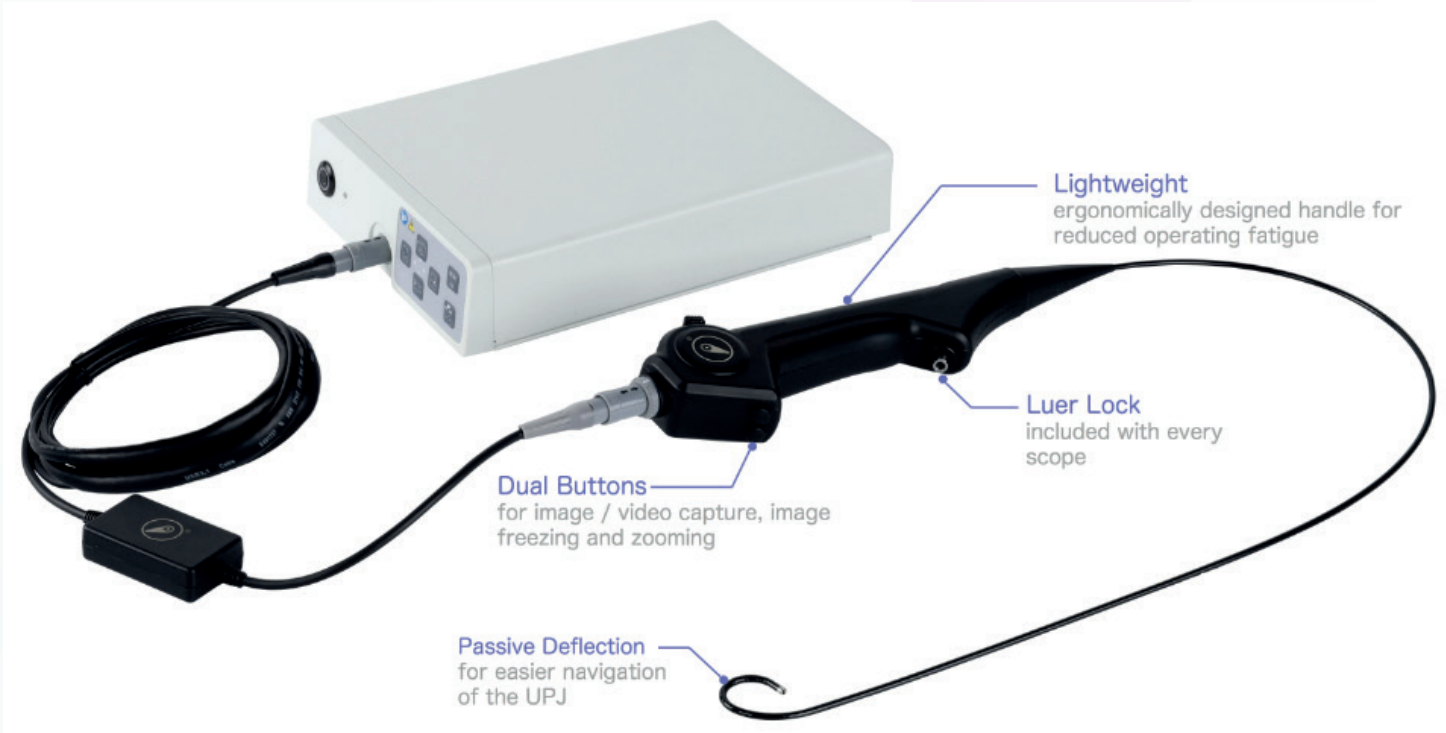

- Expandable and flexible
- Easy for cleaning
- No adhesive needed

Allergy-Free Silicone Prongs

- Minimizes skin irritation
- Cured for better stability and flow path
- Ultra soft and lightweight
- Available in 4 sizes

RF14A Reusable Felexible Ureteroscope

Optical system

- Field of view 110°
- Depth of field 3–50mm
- Direction of view 0°

Insertion portion

- Insertion tube OD 7.5Fr/8.4Fr/9.2Fr
- Angulation range U 275° / D 275°
- Inside diameter 3.6Fr
- Working length 680mm

8.4Fr
